PROJECTS

Deepfakes detection algorithm - *As a part of SMART INDIA HACKATHON 2020.*
We have developed a working application on detection of deepfakes.

Satellite Image Processing — *Classification of farmlands/vegetation on a satellite image.*

We have developed an algorithm that can classify a satellite image based on farmlands using a machine learning algorithm.

Swift Bot — *A chatbot application for tourism.*
We developed a chatbot for tourism using IBM Watson.

Instagram filters — *As assignment projects in Spark AR Open program.*
We developed a few filters in Spark AR with the help of Blender, links to which have been attached at the bottom. This was done as a part of a course by School of Innovation which was sponsored by Facebook.

Language Project — *As a part of our curriculum.*
We went to Microsoft, Hyderabad office in order to communicate with an employee over there and to get a good idea about the organisation.
